

Vernon Green's Alzheimer's Program.

State of the art. State of the heart.

State of the art. State of the heart.

Excellence and compassion

Restoring dignity and life quality to those suffering from Alzheimer's disease and related dementias lies at the heart of our Alzheimer's program. For over 15 years, the Special Needs Unit within our Vernon Green nursing facility has supported this mission by integrating behavioral management methods and truly caring service. Families can take comfort knowing that our goal is to help each resident reach his or her potential.

Special environment

Residents live in a safe, secure home-like environment that includes a beautiful garden area, hair salon and a kitchen used for special cooking activities.

Special expertise

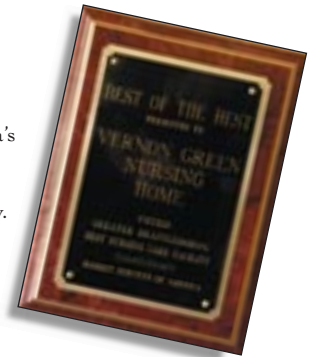

Our team members possess all the professional skills plus the personal commitment so necessary for exceptional Alzheimer's care. We're proud to say that our Special Needs team members share

a sense of mission along with abilities augmented by clinical training.

Serving with compassion, these dedicated people help residents to perform to the best of their ability.

Vernon Green has continuously earned Market Surveys of America's "Best of the Best" award as Greater Brattleboro's Best Nursing Care Facility.

Special approach to care

Everyone has unique personal needs as well as social needs. That's why we tailor therapeutic activities to each individual and conduct a variety of daily group activities to stimulate social interaction. Providing this level of attention is possible in part because we maintain a higher staff-to-resident ratio than most care facilities. We understand the role that family and friends play, too, and invite these important people into our programs.

We invite you to see for yourself

An outstanding Alzheimer's program is yet another reason why Vernon Home continues to build on a long-standing reputation for excellence. To learn more, contact our Admissions Coordinator at 802-254-6041.
